Re: Mountaire Farms of Delaware, Inc.
Order on Consent

Dear Ms. Cohen:

In accordance with paragraph 51 of the above-referenced Order on Consent, we are submitting the attached written report summarizing all actions taken in accordance with this Order ("Progress Reports") for the 2nd quarter, 2004.

"I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to properly gather and evaluate information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations."

Sincerely,

A handwritten signature in black ink, appearing to read "Michael Tirrell".

Michael Tirrell
Vice President of Processing Operations

Walter Moorhead (Mountaire Farms)
Tom Miller (Mountaire Farms)
Gordon Serman (Mountaire Farms)
Jeremy Homer (Parkowski, Guerke & Swayze)

**Quarterly Progress Report
(Reference Paragraph 51 of Order)**

2nd Quarter, 2003 (April-May-June):

- Per paragraph 34, all residents identified by sampling of nitrates above 10 mg/l who have requested bottled water have received bottled water.
- Per paragraph 36, a plan to provide a permanent alternate water supply was submitted via certified mail on July 16, 2003 to EPA for review and approval, with copies to DNREC and DHSS.
- Per paragraph 38, the wastewater treatment/spray irrigation system is being operated in a manner to control nitrogen loadings to the spray fields; the production wells are in operation (no irrigation wells operated due to substantial precipitation during the time period); quarterly groundwater sampling in progress.
- Per paragraph 47, a copy of the Order was sent to the following contractors via certified mail:
 - o Envirocorp Inc (testing laboratory); Date of delivery 6-12-03
 - o Eastern Shore Coffee (bottled water supplier); Date of delivery 6-14-03
 - o A.C. Schultes of DE (well driller); Date of delivery 6-30-03
- Monitoring well #38 replacement installed on 6-25-03.

3rd Quarter, 2003 (July-August-September)

- Certified letters mailed to the following residents explaining the Order and requesting a meeting to discuss alternate water supply:

(b) (6)(b) (6)
(b) (6)(b) (6)(b) (6)(b) (6)
(b) (6)(b) (6)
(b) (6)
(b) (6)(b) (6)(b) (6)(b) (6)
(b) (6)(b) (6)(b) (6)(b) (6)
(b) (6) (b) (6)(b) (6)

All letters received by the residents (copy of a sample letter and return receipts attached).

- Per paragraph 38, the wastewater treatment/spray irrigation system continues to be operated in a manner to control nitrogen loadings to the spray fields; the production wells are in operation and approximately 3.03 million gallons of groundwater was sprayed on the (b) (6) Farm from the irrigation well located by spray field WHBJ 1; quarterly groundwater monitoring completed including the newly installed MW 38.

4th Quarter, 2003 (October-November-December)

- Meetings held with the following residents to explain the Order and the alternate water options. Acknowledgement letters left with residents (returned copies attached with their choice).
 - o (b) (6)(b) (6) Spoke with (b) (6) on October 10, 2003 to arrange the meeting. (b) (6) stated he is planning on moving in the near future, does not want to pursue a well or treatment unit and prefers to continue with bottled water until he moves.
 - o (b) (6)(b) (6)(b) (6)(b) (6): Meeting held with the (b) (6) on October 13, 2003. Chose ion exchange treatment system.
 - o (b) (6)(b) (6) Meeting held with the (b) (6)s on November 8, 2003. Mr. (b) (6) stated he would not sign the letter and wants to remain on bottled water*.
 - o (b) (6)(b) (6)(b) (6) Meeting held with the (b) (6) on October 24, 2003. Chose ion exchange treatment system.
 - o (b) (6)(b) (6)(b) (6)(b) (6): Meeting held with the (b) (6) on October 15, 2003. Chose to remain on bottled water*.
 - o (b) (6)(b) (6)(b) (6)(b) (6): Meeting held with (b) (6)(b) (6) on November 11, 2003. Chose to remain on bottled water*.
 - o (b) (6) (b) (6)(b) (6): Meeting held with the (b) (6) on October 15, 2003. Chose to remain on bottled water*.

* It should be noted that during the meetings with the residents, it was explained that bottled water was not considered by EPA to be a long-term alternate source of water. However, several residents expressed their desire to remain on bottled water and were advised that EPA would probably be contacting them regarding this issue. Therefore, Mountaire is holding off on scheduling the installation of the two ion exchange units should the residents wanting bottled water change their minds after being contacted by EPA.

- Per paragraph 38, the wastewater treatment/spray irrigation system continues to be operated in a manner to control nitrogen loadings to the spray fields; the production wells are in operation, however, no irrigation wells were operated during the this quarter due to crop harvest and substantial precipitation; quarterly groundwater monitoring completed.

1st Quarter, 2004 (January-February-March)

- Ion exchange units installed and operational at the following residences.
 - o (b) (6) (b) (6) (b) (6) (b) (6) (b) (6)
 - o (b) (6) (b) (6) (b) (6) (b) (6) (b) (6)
 - o (b) (6) (b) (6) (b) (6) (b) (6) (b) (6) (b) (6)
- On March 23, 2004, drinking water samples were obtained from the three residences with the following results (analyses attached):
 - o (b) (6) (b) (6) - <1.0 ppm Nitrate as N
 - o (b) (6) (b) (6) 1.48 ppm Nitrate as N
 - o (b) (6) (b) (6) (b) (6) - 18.1 ppm Nitrate as N**

** As a result of the nitrate levels in the treated water at the (b) (6) residence, Mountaire had the contractor (Sharp Water) return to the (b) (6) to determine the cause of the elevated reading. Sharp determined that the piping under the house was not installed properly and corrected the piping. The (b) (6) water was re-sampled on April 2, 2004 and verbal results from the lab (Envirocorp) showed a nitrate level of 2.53 ppm Nitrate as N. Hard copy of this analysis will accompany the 2nd quarter report.

- Per paragraph 38, the wastewater treatment/spray irrigation system continues to be operated in a manner to control nitrogen loadings to the spray fields; the production wells are in operation, however, no irrigation wells were operated during this quarter due to sufficient precipitation for the cover crops planted; quarterly groundwater monitoring completed.

2nd Quarter, 2004 (April, May, June)

- Envirocorp analysis of the (b) (6) residence attached.
- In response to Deane Bartlett's letter of March 4, 2004 to Jeremy Homer regarding the addition of salt to the ion exchange units, Mountaire mailed letters to the residents (copy attached) offering to have the contractor add salt to their systems during delivery if they so desired. Mountaire received letters back from (b) (6) (b) (6) (b) (6) (b) (6) (b) (6) (b) (6) accepting this offer. Sharp Water will contact the residents prior to delivery to ensure someone is home to allow access to the system.
- Per paragraph 38, the wastewater treatment/spray irrigation system continues to be operated in a manner to control nitrogen loadings to the spray fields; the production wells were in operation and 7.7 million gallons of groundwater was sprayed on fields WHBJ 5, 6 and the (b) (6) Farm; quarterly groundwater monitoring completed.

As you know, Mountaire has coordinated the installation of an ion exchange unit in your residence. As explained in our meeting, salt must be added periodically to ensure the proper operation of the unit. Although Mountaire will be providing salt to you at no charge through our contractor, Sharp Water, we were not planning on physically adding it to your unit. However, this letter advises that if you so desire, Mountaire is willing to have Sharp Water add the salt to your system when it is delivered to your home provided someone is there to allow Sharp Water access to the system. If you would prefer Sharp Water to perform that function, please notify me in writing. Enclosed is a self-addressed envelop with postage for that purpose.

Sincerely,

Jeffrey Smith, REM
Environmental Manager
